Project Inspector: Allen Sawitke, P.E.

I. Introduction

A. Project Objectives

The Phase 9 Mine Seal Project was undertaken to eliminate the public safety hazards resulting from unreclaimed mine openings at several abandoned hardrock mines in Lewis & Clark and Jefferson Counties, Montana. Closure of dangerous shafts and adits through backfilling, bulkhead installation, and/or fencing was accomplished to eliminate accidental entry.

B. Project Location

The project covered fourteen sites close to Helena, Montana in the Montana City, Mount Ascension & North Elkhorn Mining Districts. Legal descriptions are listed below and site locations are shown on the vicinity map contained herein.

Montana City Mining District,	Jefferson County		
Dike Lode Site	T9N R2W Sec.	18	NW
Gold Bug Site	T9N R2W Sec.	18	NE
Kaiser Site	T9N R2W Sec.	18	NW

Mount Ascension Mining District, Jefferson and

	Lewis	& C]	lark	Cour	nties
Diehl Sites #1 & #2	T9N	R3W	Sec.	5	S
May-Be-So Site	T9N	R3W	Sec.	4	NE
Mount Ascension Heights Site	Tlon	R3W	Sec.	31	SW
Red Letter Site	T9N	R3W	Sec.	5,	NW
Susie Site	T9N	R3W	Sec.	5	NE
Touchstone Site	TlON	R3W	Sec.	31	SE
Walker Site	T9N	R3W	Sec.	4	NE

North Elkhorn Mining District,	Jefferson County	
Maupin Creek Site	T8N R2W Secs. 8	& 17
McClellan Creek Site	T9N R2W Sec. 17	SW
Mill Creek Site	T8N R2W Sec. 7	SE
Strawherry Creek Site	T8N R2W Sec 7	NW

C. History

Hardrock mining has taken place in Montana since 1862 and was essentially unregulated from a reclamation standpoint for over one hundred years. This resulted in thousands of hazardous shafts and adits in mining districts across the state.

A brief history of mining districts included in the Phase 9 Mine Seal Project follows. Where production statistics are available for individual sites, they are noted.

Montana City Mining District

Production totals from lode mines in the Montana City District from 1905 - 1951 are 135 ounces of gold, 1,608 ounces of silver, 8,046 pounds of copper and 3,530 pounds of zinc with a total value of \$6,909.

Mount Ascension Mining District

This district is not referenced specifically in mining literature but is within the Helena district whose history follows.

Placer gold was discovered in 1864 and the first lode mine that same year. Total production is estimated at \$23.5 million to the end of 1928 of which \$16.1 million was in placer gold, \$6.3 million in lode gold, the rest from silver, lead, copper, and zinc.

North Elkhorn Mining District

This area has yielded gold from both placers and deep mines. Production of lode mines from 1903 - 1956 is reported at 15,427 ounces of gold, 118,057 ounces of silver, 103,753 pounds of copper, 740,792 pounds of lead, 12,042 pounds of zinc for a total value of \$559,831.

D. Site Description And Problems

The sites included in this project are located in or near residential areas, historic sites, close to public roads or in recreation areas. All mine openings threatened public safety. The shafts involved were of depth great enough to prevent unaided escape upon entry. Adits were reclaimed to protect the curious from unsuspected dangers.

II. Description of Project Reclamation

A. Project Planning

Backfill was recommended for all mine openings to permanently eliminate the hazards. Many landowners refused to allow this, insisting instead on accessing bulkheads or fencing. These techniques do accomplish the goals of preventing accidental entry but are semipermanent in nature and amy require maintenance in the future.

B. Chronological History

Pre-Bid Conference Bid Opening Contract Award Contract Awarded To: August 21, 1984 August 31, 1984 September 4, 1984

C. Equipment

Air Compressor with Air Drill Dynamite for Blasting Post Holes Cat D-7 Dozer Backhoe

D. Construction Operations

The Contractor performed the following:

- 1. Backfilled 2 mine openings (adits)
- 2. Backfilled l adit
- 3. Backfilled 17 shafts
- 4. Installed 6 foot chainlink fence
- 5. Installed combination barbed and woven wire fence at two sites
- 6. Sealed shaft openings
- 7. Revegetated all areas disturbed by construction activities

III. Cost Summary

A. Final Payment Request

A copy of the Final Payment Request is contained in Appendix A. That document contains the final quantities and costs for each work item.

B. Change Order

The following Change Order was executed during the course of the project:

1. Change Order #1 - Additional dozer work and seeding required to close Maupin Creek shafts

C. Cost Per Site / Unit

The following summary describes the work performed (with estimated or measured quantities) and the total cost for each site:

- each site: 1. Diehl Sites #1 & #2 \$ 257.00 a. Backfill 1 adit & 2 shafts (163 c.y.) b. Seed, fertilize & mulch Dike Lode Site \$ 3,614.00 a. Install wire fence (16 rods) b. Install hazard signs (8 each) c. Seed, ferilize & mulch \$ 1,513.00 Gold Bug Site Install 6 foot chainlink fence a. (117.1 c.y.) Install hazard signs (4 each) Seed, fertilize & mulch C. 397.00 4. Kaiser Site \$ a. Backfill l shaft (275 c.y.) b. Seed, fertilize & mulch Maupin Creek Site \$ 468.00
- 5. Maupin Creek Site \$ 468.00
 a. Backfill 3 shafts (333 c.y.)
 incl. C.O. work
 b. Seal shaft with lock and hinges, board
 up adjacent opening
 c. Seed, fertilize & mulch
- a. Install wire fence (10.7 rods)
 b. Install hazard signs (4 each)
 c. Seed, fertilize & mulch
 7. May Be So Site \$ 109.00
 a. Backfill mine opening (adit)
 b. Seed, fertilize & mulch

\$ 2,404.00

McClellan Creek Site

8.	Mill Creek Site a. Backfill 1 shaft (44 c.y.) b. Seed, fertilize & mulch	\$	109.00
9.	Mount Ascension Heights Site a. Backfill 3 shafts (105 c.y.) b. Seed, fertilize & mulch	·	185.00
10.	Red Letter Site a. Backfill 1 shaft (62 c.y.) b. Seed, fertilize & mulch	\$	131.00
11.	Strawberry Creek Site a. Backfill l shaft (39 c.y.) b. Seed, fertilize & mulch	\$	102.00
12.	Susie Site a. Backfill l shaft (65 c.y.) b. Seed, fertilize & mulch	\$	135.00
13.	Touchstone Site a. Backfill mine opening (adit) b. Seed, fertilize & mulch	\$	109.00
14.	Walker Site a. Backfill 3 shafts (60 c.y.) b. Seed, fertilize & mulch	\$	129.00
Tota	al Project Cost	\$ 9	,662.00

IV. Summary

A. Completed Reclamation

The required work was completed within the Contract time allowed.

The project resulted in the complete plugging of some adits and shafts and limits access to other adits and shafts by installed fences. Hazard signs were installed where appropriate. Revegetation of disturbed areas was accomplished.

B. Comments

The Contractor completed the work as specified.

Monitoring of all sites should be undertaken periodically to insure all backfilling and fencing work and revegetation efforts remain intact.

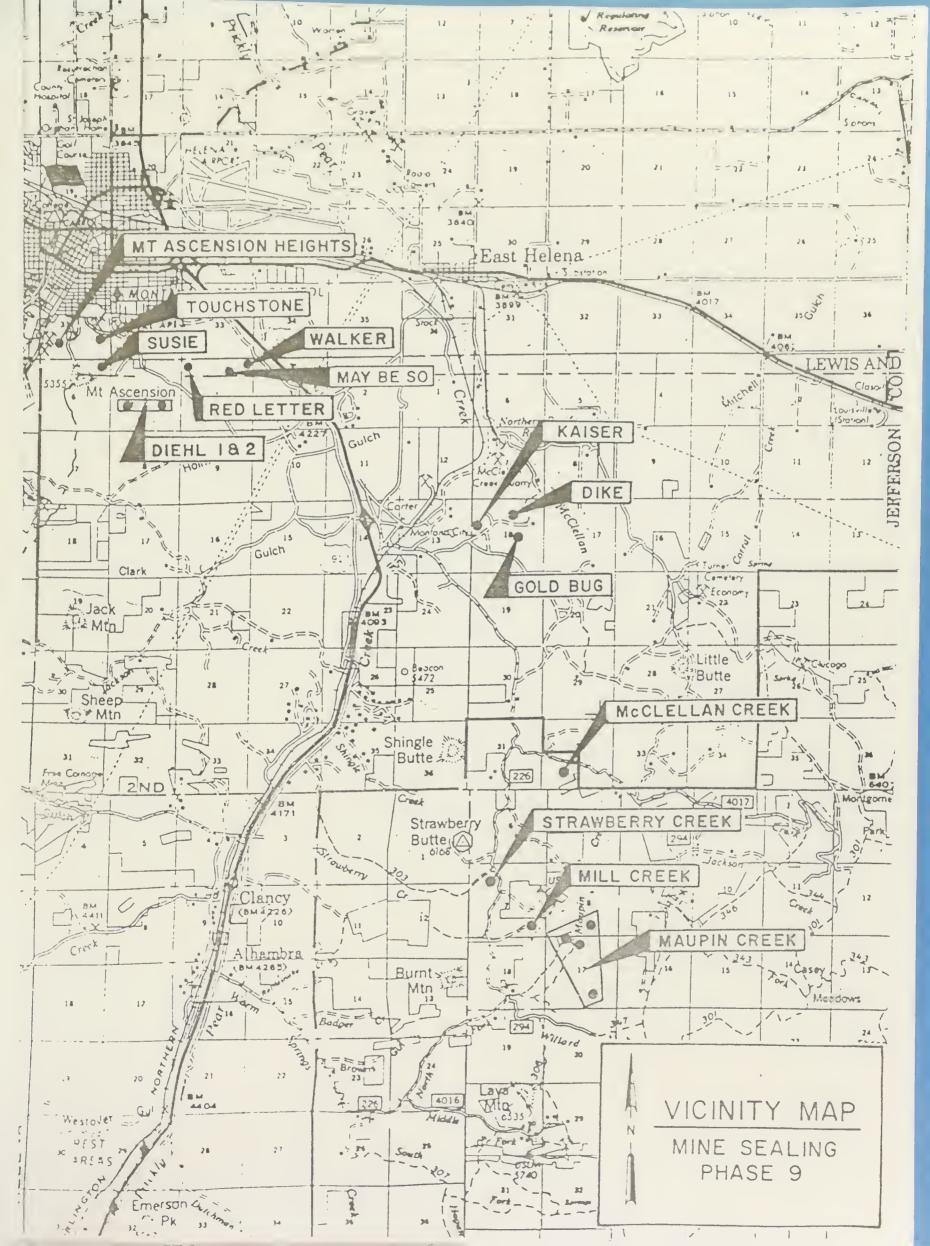

V. Slides

The slide log and slides are contained in Appendix B.

Slides

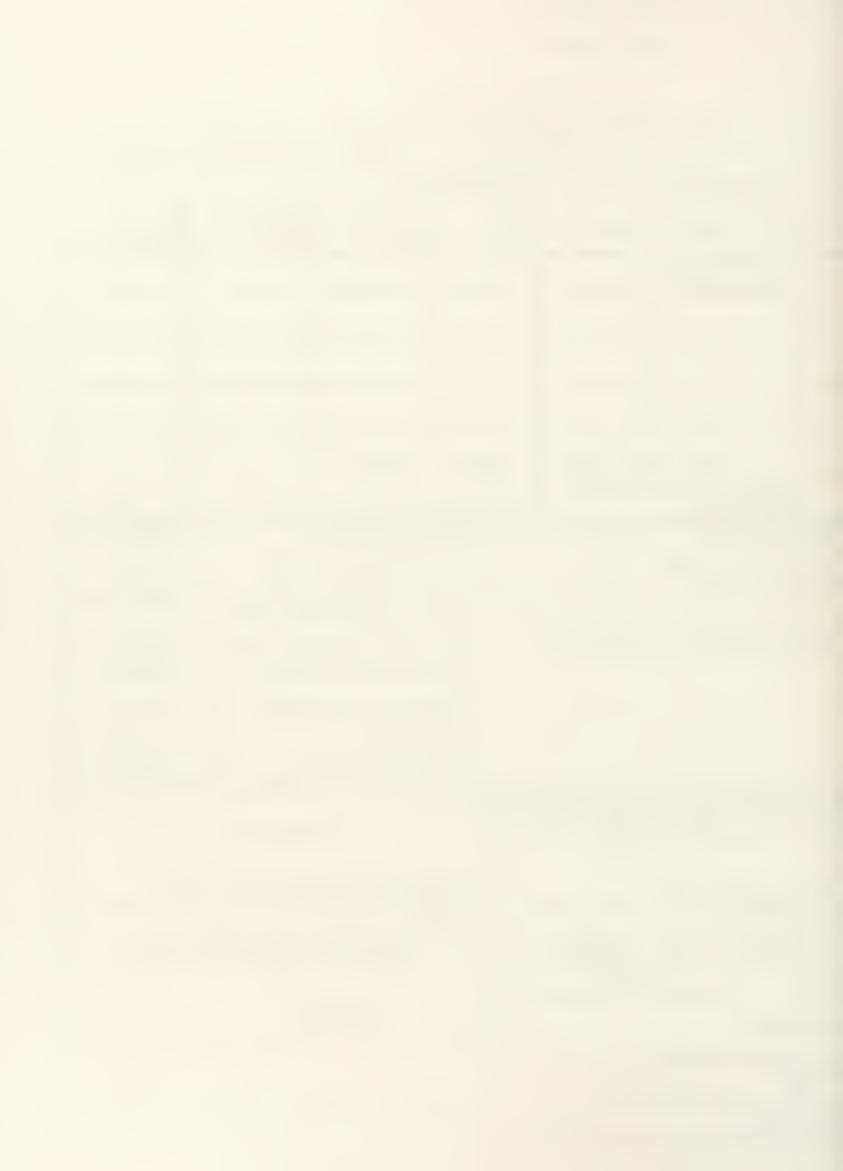

the slide log and slides are contained in Appendix B.
